BRUTAL SCENE THIS MORNING AT A MILL

ON LONG ISLAND. The Referee's Life Threatened by a Rough-Baller Brown and One of the Contestants Knocked Down by the Crowd and Kicked

and Beaten-The Referee Calls It a Draw

The party of sporting men that ventured out on Long Island at an early hour this morning to witness a finish fight between Sailor Brown, of Boston, and Dick Moorehouse, of Salem, Mass., were treated to quite a sensational scene at the close of the three rounds

which the men fought. The referee, Jerry O'Brien, a good-natured, whole-souled, old sport was somewhat startled. An unknown ruffian touched his chest with the barrel of a 38-cal.bre revolver, and exclaimed at the same time that if Moorehouse did not get the decision on account of his being fouled by the sailor that Jere would

receive the contents of the little gun. While this little drama was being enacted between Jerry and the ruffian, Brown was being unmercifully kicked and punched by no less than twenty men. A well-known pugilist jumped to the centre of the all-round fight and pushed the men away, one after the

fight and pushed the men away, one after the other, until quiet prevailed.

The man with the pistol shot off behind a tall cedar tree, and was not heard from until on the way home.

Moorehouse is twenty-two years of age, stands 5 feet 8 inches tall and weighs 137 pounds. Jack Kenny and Billy Davis were his seconds. Brown is three years older, twenty pounds heavier and is the same height. He was seconded by Patsy Curtain and Johnnis Golden.

They fought with their bare knuckles, Queensberry rules, for a purse which amounted to about \$100.

Moorehouse split Brown's left cheek in the first round and blood poured out freely. The second round was clinch after clinch. Moorehouse slipped down several times because of the wet gound.

Morrahouse supped down several times be-cause of the wet g ound.

The third round had hardly opened when the sailor serzed his man and threw him heavily. Then came the disgraceful scene, and such of its kind has seldom been witand such of its kind has seldom been wit-nessed in this vicinity.

The referee declared the battle a draw.

Then Brown was again punched and kicked.

His head and body was cut and bruised from

top to bottom.

The coach that brought Brown to the city

was stopped on the road, and if the same pu-gillst who had stopped the other fights had not arrived on the scene Brown would have fared much worse than he did.

On reaching this city he was conveyed at once to an uptown doctor, who attended to his wounds.

DRESS SHIRT GONE ASTRAY.

A Friend of A. Blackburn Lost It, but A Blackburn Won't Tell How.

An Evening World reporter called on A Blackburn at 29 Murray street this morning. He found him, with the assistance of pretty telegrapher, after searching every other corner of the four-story building, on

the upper floor at the cashier's window. The window was closed, and the reporter pounded upon it gently with his finger nails.

An aperture was made at the bottom by opening a six-inch square porthole, and in this the reporter saw six square inches of

face.
It was a blond face, with a small yellow mustache.
'I wish to see A. Blackburn," said the re-

porter to the six square inches.

The porthole was closed, the big window thrown open and a little man said,

"How did you come to lose your dress shirt?" queried the reporter.

The window was closed again, and the reporter could hear whispering behind it. Then it opened again and A. Blackburn said:

"I didn't. It was a friend. He says he would ra her not tell, but if you have it he will nay the \$25 reward offered in the adverwill pay the \$25 reward offered in the adver

Brooklyn Dector Seriously Acoused by a G'ri Telegraph Operator.

Dr. George B. Rockwell of 226 McDonough street, Brooklyn, was pulled from his bed A PISTOL AT A PRIZE-FIGHT. early this morning by detectives from the station on a most serious charge.

Louis Kirschbaum, of 511 East Nineteenth

street, reported at the station yesterday that his sister-in-law, Annie Lauretta Murphy, who is a very pretty girl, seventeen years of

sge, was in a precarious condition at his house, the result of malpractice.

Coroner Eidman took the girl's antemortem statement last evening. She said that she was a telegraph operator at the Western Union office. In March last she formed a chance acquaintance with Cyrus Watson.

formed a chance acquaintance with Cyrus Watson. The acquaintance became too intimate, and finally the girl found herself in trouble.

Then Watson took her to Rockwell, and the latter used instruments and drugs, delivering her of a child prematurely.

But Her Age Was Misrepresented to Secure a Cheaper Passage.

Frank Attello, the thirty-year-old Italian who was married to Jennie 'Cappel by Alder man William H. Walker, of the Ninth Ward at the City Hall, on Thursday, was to-day entenced to a term of three months' impris onment for disorderly conduct by Justice Kilbreth, at the Tombs Police Court.

Attello took his bride to her home after heir marriage. Her parents had consented to the union because the girl said she would run away if they objected. After the ceremony the girl concluded that she did not

mony the girl concluded that she did not love Attello, and when he invited her to accompany him to his home she objected, and he attempted to compel her to go.

Her brothers interfered, and Attello went away and returned with a small arsenal, threatening to annihilate the entire family.

He was arrested, and, in addition to the charge of disorderly conduct, he was held upon the charge of abduction.

The agent of the Society for the Prevention of Cruelty to Children learned that the young wife came here last December from Italy under a passport in which her age was given as thirteen years.

It was proven to-day that she was more sixteen years old, and that her age at the time she came from Italy was misrepresented in order to secure a cheap passage over the ocean.

A CONDUCTOR CAUSED A BLOCKADE.

Why a Long Line of Impatient People

Walked Across Brooklyn Bridge To-Day. A delay on the bridge shortly after 10 o'clock this morning, which, according to Supt. Martin lasted "only two minutes," semed considerably longer to the passengers who were obliged to wait in the long line of cars, which extended from the station on the New York side to a point opposite the prom-

New York side to a point opposite the promenade steps.

Many passengers alighted from the trains, preferring walking to waiting.

The cause of the delay was a conductor, who failed to disconnect the "draw" of the locomotive from the rear car of a train bound for Brooklyn.

The train was obliged to back out again, while the incoming trains kept coming in on short headway.

JUSTICE DELEHANTY ISSUES A WARRANT FOR HIS ARREST.

Granted at the Instance of the Long Island Railroad Company-Police Capt. Woods and Commissioner of Public Works Harrigan in the Same Bex-All Must Be in

Court on Monday.

The people of Long Island City were thunderstruck this morning when it became known that Justice Delehanty had issued warrants for the arrest of Mayor Gleason, Commissioner of Public Works Joseph Harrigan and Police Capt. Anthony S. Woods, who were charged by the Long Island Railroad Company with wilful destruction of property in tearing

Court.

It was supposed that hostilities were suspended on both sides until Monday next, but the railroad people evidently endeavored to steal a march upon the Mayor and prejudice the case of the city against them. I he general sentiment has, however, set so strongly in Mr. Gleason's favor that the attempt will prove futile.

Commissioner Harrigan was at the time serving peremptory notices upon the Export Lumber Company and E. W. McClave to instantly remove from Flushing and Front streets the timber belonging to them, which was obstructing those thorough ares. He was met afterwards by Officer Cody and served with the warrant, as was Chief Woods, who was home in had

As soon as Cody left him Mayor Gleason hurried to Commissioner Harrigan, and, pointing to a pile of yellow pine timber lying on front street near Third, said:

Having given these instructions he left for this city, while the Commissioner proceeded to carry out his orders and by noon a gang of laborers had removed the lumber.

While these events were occurring in the lower part of the city Corporation Counsel Walter J. Foster was appearing before County Judge Garrett J. Garretson at the Queen's County Court-House. Last night notice was served upon Hinsdale & Sprague that the city intended to argue for a modification of the injunction issued by the Judge on Thursday night restraining any further interference by the Long Island City officials with the property of the railroad.

The sheds which had been demolished lay with one side upon the curb on Front street, and the other resting against the buildings in which are the offices of the Master of Telegraph, the Long Island Express Company and the News Company.

It was necessary for the thousands of passengers daily taking the train on the Rockaway and Woodhaven division to pass them, to their imminent danger. When the notice was served upon the company laborers were immediately put at work and the dangerous roof removed.

When these facts were stated Counsellor Foster withdrew his motion.

THOSE UNITED LABOR INSPECTORS.

Lawyer Post Believes Their Legal Term of Office Has Expired.

As intimated in yesterday's Evening WORLD, considerable discussion is going or in organized labor and political circles, just now, regarding the tenure of office of the election inspectors of the United Labor party, who were appointed last year.

Lawyer Louis F. Post, who was an active leader in the Labor party and made the argument for the appointment of the inspectors,

aid to-day:
"I would not undertake to give an opin-ion without carefully examining the of last vest in connection with

said to-day:

"I would not undertake to give an opinion without carefully examining the law of last year in connection with the Consolidation act; but speaking from memory of the law, my impression is that the statutory time for the appointment of these inspectors was prior to the first reg.stra. In that is true. I should think the term of office would run from that time, and not from the date of the formal certificate. Intending again only to express an impression and not a deliberate opinion, I should say that the labor inspectors who were appointed at the proper time last year and were forcibly prevented from serving, are entitled to pay for the registration and election days of last year, and not others.

"The case of those appointed on the 7th of last November would seem analogous to that of a regular Democratic or Republican inspector appointed on that day to fill a vacancy, in respect to whom it would not be claimed that his term extended beyond the statutory time for appointment of inspectors.

"I do not think that the terms of the formal certificates govern the question. The true test is: when, under the law, does the term of office begin—at the date of actual appointment or at the time when appointment is required by law to be made?

"I think the latter, and if I am right in that the term of office of these inspectors expires prior to the first day of registration, and they cannot serve this year."

Corporation Counsel Beekman has not been called upon by the Police Commissioners for his opinion, and he says there will be no occasion for his opinion until the inspectors assert their right to act as such.

An "Evening World" Man Goes Along in the Sea Lark.

Mr. Cleveland Is a Great Fisherman and Not Afraid of Rough Water-He Smokes Incessantly While Fishing and Pays Strict Attention to Business-He Catobos Most Fish, Too-The Bay Alive with Boats to See Mr. Stickney's Big Yacht

ISPECIAL TO THE EVENING WORLD. SURF HOTEL, FIRE ISLAND, N. Y., July 28. The lights in the cabin of the steam-yacht Susquehanna went out at 12 o'clock last night, and the President and his fellow-fishermen turned themselves over in their comfortable bunks and were left to dream of bauling in the coveted bluefish by the hundred or perhaps of struggling to land some vagrant whale. The only noise was made by the drizzling rain and the footsteps of the watchman, who was left to guard the distinguished

man, who was left to guard the distinguished sleepers.

The night was very dark: there was a big round moon somewhere overhead, but its rays could not penetrate the nist that hung close around Fire I-land.

The position of the yacht was revealed by two little lanterns in the rigging at either end, and these furnished all the light except what was spread upon the water at regular intervals by the fatthful beacon in the tall lighthouse on shore not far oif.

The yacht lay in the bay about three minutes' row from the Surf Hotel, where its part furnished a topic for much animated discussion among the guests at the hotel, as well as over a good part of the country, and some of the more timid and imaginative ones wondered if the boi er was safe and everything was all right. Fortunately everything was all right, and this morning when the sun rose and at intervals shone brilliantly through fleecy clouds, the Susquehanna's position had not changed.

A strong northwest wind was blowing which wasn't very encouraging for bluchshing because it stirred up the weeds in the bay and

position had not changed.

A strong northwest wind was blowing which wasn't very encouraging for blucfishing because it stirred up the weeds in the bay and took them over the fishing grounds.

The President and the reat of Mr. Stickney's guests were late in turning out. They bad good sport yesterday and wanted to be fresh for the fray this morning. Capt. Cushing appeared on deck shortly after 5 and busied himself about the boat. The fiag announcing the breakinst of the yacht's crew was hoisted at 7 o'clock. Just ten minutes after this the hardy Postmas er General appeared on deck, and was followed by Mr. Hill at 7.15. There came into view of those on shore a portly figure clad in a light suit. It was President Cleveland.

He had his hat in his hand, and after greeting his two friends, who had sated themseves under the awning in the stern, he scanned the sky and water hastily and then put on his hat and took a comfortable chair one after another, according to their rapidity in dressing. All were called at 7 o'clock, and if Mr. Cleveland crawled out of his bunk immediately, as he uncombtedly did, it takes him just five minutes to don his fishing rig and prepare for breakfast.

At 7.35 a bell announced the morning meal. The Evening Wonlin reporter had chartered a 40-foot sloop, the Sea Lark, the only bout to be obtained, and was ready at an early hour to chronicle the proceedings of the day. Capt. Furman, who sailed the Sea Lark, is an old sea dog and an experienced pilot.

At 7.55 Capt. Theodore Wickes steered the

pilot.
At 7.55 Cept. Theodore Wickes steered the sloop Gerald ne, which was to carry the President's party to the fishing grounds, up to the yacht, all ready for the reception of the distinguished fishermen.

Ten minutes after the 80 clock gun boomed the warty came out on deck again and steed

the distinguished fishermen.

Ten minutes after the 80'clock gun boomed the party came out on deck again and stood in the bow looking doubtfully at the reefing on the Geraldine and the troubled aspect of the water, for the breeze had increased to a gale of twenty-five miles an hour.

The sloop Scud, which had also been hired to fish from, sailed around the yacht several times, and then it hauled up and went alongside the Geraldine.

A fleet of boa's had started across from Babylon with sightseers, and the bay presented an animated appearance.

The fishermen on the steam-yacht held quite a long consultation, and glanced frequently at the racing white-caps to windward. They finally decided to brave the weather in the bay, and at 8.40 they all boarded the Geraldine and started for East Channel, where they fished yest-rday, under a double reef. The Scud had started on ahead. Mr. Cleveland was seated under the summer cabin, and seemed to enjoy the sail immensely.

It was a beautiful sail up the bay. The two sloops kept close together and tacked to the desired spot, when they anchored, the same as they did yesterday.

Mr. Cleveland is President, just the same, when he is fishing as when he is in the White House. His friends always address him as "Mr. President," and say frequently "There, the President"s got ano her," for Grover can catch the fish if there is any beneath him. He smokes continually while fishing and talks little.

When he has dexterously ho ked his fish he gives went to a pleased expression, such as "Here is another," or "Pve got one," and

He is always the first to begin and the last to quit fishing.

The fishermen took the same positions in the loats as yesterday, the President on the port quarter of the Gera dine.

They were troubled with seaweed. Mr. Cleve and fished away industriously and was very patient. He did not look away from his pole when one of the occupants of the Send hauled in a fine bluefish at precisely 9.55.
